

VULKEM® 931

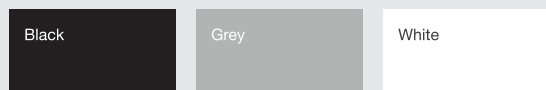

One-part high performance urethane elastomeric sealant...

Vulkem 931 is a one-part, moisture curing, fast skinning polyurethane sealant. Vulkem 931 is durable, flexible and offers excellent performance in moving joints.

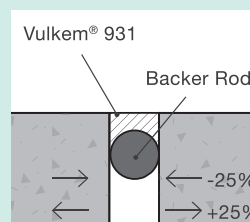

Vulkem 931 does not require a primer on most construction materials, e.g. aluminium, concrete, granite etc. Once cured, Vulkem 931 exhibits tenacious adhesion and an aesthetically appealing satin sheen finish.

Standard Colours

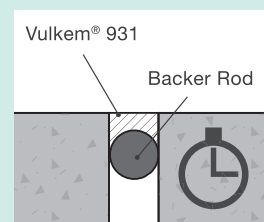

Features & Benefits

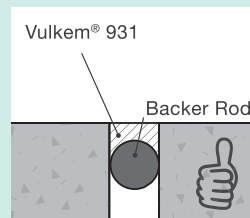

Joint Movement Capability

Suitable for a variety of joint widths with -25/+25% movement capability.

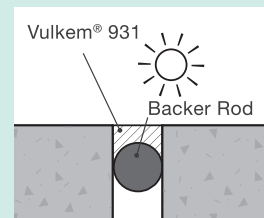

Fast Cure

Tack free time of within 55 minutes under ASTM C679 test standard.

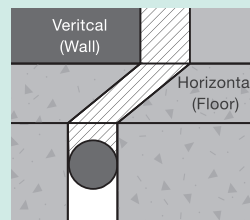

Field Proven Sealant
